

# Carlisle 2006

## Full Size Chevrolet Nationals

The Full Size Chevrolet Nationals event will see two major changes this year to the scope of the event. In previous years all cars were judged using the 1000 points judging system to determine the Grand National Champions and after further review it has occurred that it is entirely too much work for so few judges to accomplish, as well as many participants simply don't care if their car receives a score or not. This has led to the first major change to the FSCN.

### Change 1:

This year's event will actually see a 3 class Grand National Competition added where participants who wish to have their car judged using the system will be classified either A. Stock/Original B. Semi Modified or C. Modified. This classification system is based upon the previously published FSCN rules adopted in 2003. Cars wishing to participate in the FSCN Grand National Competition will be required to pay a \$10 additional entry fee to the Mid Atlantic Impala Association and in addition to the entry in the FSCN GN they will also be entered into the 2006 Old Car Championship Series Competition. Grand National Award winners will have their trophy presented to them at the stage on Sunday afternoon if they are able to attend, if not we will present these trophies on Saturday as well. Grand National Competitors will need to take the OCCS test before leaving Carlisle.

### Change 2:

Since in previous years we have used the 1000 point system to determine winners in the respective FSCN classes – separate classes from the fun field competition – we have determined we will use Autorama style judging to determine the winners of their classes and awards will be distributed according to the score their car receives as a result. These awards will be announced and distributed in the FSCN awards ceremony on Saturday evening.

## 2006 Events Schedule

### Friday

Preliminary Setup 0700 - 1200 noon
